

ROOFTOP PARK AT 555 W. MONROE, CHICAGO

Rooftop Deck Connecting People to Green Roofs

As demand for Green Roofs is exploding, urban citizens are gaining much desired access to nature and open space. Located in the heart of downtown Chicago, 555 W. Monroe is a publicly accessible rooftop park. Bison pedestals support a paving stone deck that surrounds a beautifully manicured grass 'mini' field. Green Roofs have a positive impact on the environment while pedestrian access offers immeasurable value to people.

Bison Highlight: Bison Deck Supports are specifically designed for installing rooftop decks that slope to drain.

- Bison pedestals have a large footprint and are not attached to the roofing substrate.
- Simply turn the pedestal for quick and precise adjustments.
- Tabs on top of pedestals assure uniform spacing of decking pavers.
